EDUCATION

Tufts University

August 2022 – May 2026

GPA 3.73, BS Computer Science, BS Mathematics, Dean's List (Fall 2022, Spring 2024)

Somerville, MA

 $Relevant\ Coursework:\ Algorithms,\ Data\ structures,\ Machine\ structure,\ Network\ security,\ Multivariable\ calculus,\ Linear\ algebra\ SKILLS$

Programming Languages: TypeScript, React, Python, C/C++, x86-64 Assembly

Tools and Technologies: Node.js, DevOps, Docker, Django, MongoDB, PostgresSQL, AWS, Tailwind CSS, Figma, HTML

EXPERIENCE

Course Assistant for Machine Structure, Assembly Programming, and Data Structures

May 2023 – Present Somerville, MA

Tufts University, Department of Computer Science

Somerviile, MA

- Strengthened course infrastructure for 200+ students by improving autograding software, staff software, and assignment solutions
- Contributed 20+ unit tests to autograder by finding edge behavior in students' submissions
- Developed internal software to organize scoring of submissions between course staff using CI/CD pipelines to integrate updates into course infrastructure
- Graded assignments by studying 60+ submissions for functionality, testing, and course coding standards
- Reinforced course objectives and debugging principles during 1500+ student interactions by explaining lecture topics and assignments in office hours
- Strengthened understanding of course material weekly for a 30+ student lab by delivering comprehensive lectures

Full Stack Developer

September 2023 – May 2024

 $Tufts\ Jumbo\ Code$

- Somerville, MA
- Enhanced the information display for the 1,000,000+ annual visitors of the Emerald Necklace Conservancy by designing an full-stack web app in a tight-knit, agile team
- Created a secure page modification system for park administration by maintaining a MongoDB database for information, and an authentication system for editing privileges
- Automated database maintenance using PyMongo, reducing manual data handling tasks, and speeding up database work by 30%.
- Designed a cohesive user interface for 50+ pages by creating and documenting React components in TypeScript

Receptionist
Tufts University, Office of Academic Space Management

May 2023 – Present Somerville, MA

• Service community via organizing mail, and analyzing building usage for largest academic buildings on Tufts campus.

Visual Communications Intern

May 2021 – August 2021 Houston, TX

Texas Heart Institute

• Designed graphics and created animations representing cardiological research for publicity

• Interviewed for animation work by the Houston Chronicle

RELEVANT PROJECTS

$\textbf{Strava for Flights} \mid \textit{TypeScript}, \textit{Node.js}, \textit{Python}, \textit{PostgresSQL}$

July 2024

- Created an animated, interactive travel sharing product by modeling, planning, and writing a full stack web application
- Designed a modern, lively frontend with a responsive map, menu, and user statistics page using React, Tailwind CSS, and APIs from Mapbox and deck.gl
- Unified user interface by modeling 50 components in Figma before development
- Displayed over 40,000 airports on map client using RESTful APIs to communicate between frontend and backend
- Enhanced airports data by synthesizing 20+ large-scale, open-source datasets using CRUD applications developed in Python
- Hosted backend server by managing a PostgresSQL database with a Django application on an AWS EC2 instance

World Clock | JavaScript, HTML, CSS

August 2023

- Constructed a web application showing the time of user-chosen cities, with a helpful, responsive map to aid in visualization.
- Integrated OpenStreetMap and MapBox libraries for graphics. APIs were chosen as they best met the scalability requirements.
- Published application to personal website with custom autocomplete search bar and tracked development with Git.

Universal Machine | C, x86-64 Assembly, Bash

November – December 2023

- Created a Turing Complete virtual machine supporting I/O, machine arithmetic, logic, and memory tested with custom-devised unit-testing framework.
- Optimized the program by analyzing x86-64 Assembly instructions and qcachegrind and minimized expensive operations such as dereferencing or allocation through reuse of memory.
- Recreated the venerable HP15-C via Assembly instructions derived from the Universal Machine's ISA.

• Designed a file format that encodes flight itineraries into bitpacked data.

October 2023 – February 2024

• Wrote a collection of Python modules that aid the compression, like quantizing timezones, or finding the UTC offset of an airport, given its code.

SSH Setup Guide | shell, ₺₹₹

March 2024

- Wrote a concise guide for setting up a secure connection to a server.
- Described how to create public/private key pair to authenticate with server, how to setup a shell alias to quickly login to a server, and how to use key for password-less authentication in an SFTP connection.
- Created GitHub Actions pipeline to compile T_FX→ PDF, publish to repository releases and webpage.

Extracurricular Activities

Spoken Languages: Proficiency in English, Hindi, Spanish, and French

Media: Droneography, Photoshop, Lightroom, After Effects, Davinci Resolve Studio, Premiere Pro, InDesign, Wordpress

Travel: Hiking mountains, traveling to novel destinations, searching for amazing flight deals

Standards: Expert in recalling IATA airport codes, ISO country codes, and timezones
