## **EDUCATION**

Tufts University August 2022 - May 2026

GPA 3.73, BS Computer Science, BS Mathematics, Dean's List (Fall 2022, Spring 2024)

Somerville, MA

Relevant Coursework: Algorithms, Data structures, Machine structure, Programming language theory, Abstract algebra, Probability theory Network security, Assembly programming, Linguistics theory

SKILLS

Programming Languages: C/C++, Python, TypeScript, React, Rust, x86-64 Assembly, Standard ML

Tools and Technologies: Node.js, DevOps, Docker, Django, MongoDB, PostgresSQL, AWS, Tailwind CSS, Figma, HTML

EXPERIENCE

Tufts University, Department of Computer Science

Teaching Assistant for Machine Structure, Assembly Programming, and Data Structures

May 2023 - Present Somerville, MA

- Improved 150+ students' ability to engineer large-scale, low-level programs by encouraging rigorous testing, building modular architecture, and harnessing existing libraries
- Strengthened course infrastructure for 200+ students by improving autograding software, staff software, and assignment solutions
- Contributed 20+ unit tests to autograder by finding edge behavior in students' submissions
- Developed internal software to organize scoring of submissions between course staff using CI/CD pipelines to integrate updates into course infrastructure
- Graded assignments by studying 200+ submissions for functionality, testing, and course coding standards
- Enriched students' experience by participating in internal grading reviews
- Ensured constructive grading comments to help students understand course expectations.
- Guided 100+ students through course content by leading review sessions for exams
- Improved student comprehension by leading review session for 100+ students covering key course content and exam preparation
- Enhanced students' programming practices by leading a hands-on shell scripting workshop for 30+ students
- Reinforced course objectives and debugging principles during 1500+ student interactions by explaining lecture topics and assignments in office hours
- Strengthened understanding of course material weekly for a 30+ student lab by delivering comprehensive lectures
- Emphasized learning objectives for graduate offering of data structures by restructuring assignment scoring, incorporating new assignments, and holding virtual office hours

## Full Stack Developer

September 2023 – May 2024

 $Tufts\ Jumbo\,Code$ 

Somerville, MA

- Enhanced the information display for the 1,000,000+ annual visitors of the Emerald Necklace Conservancy by designing a full-stack web app in a tight-knit, agile team
- Created a secure page modification system for park administration by maintaining a MongoDB database for information, and an authentication system for editing privileges
- Automated database maintenance using PyMongo, reducing manual data handling tasks, and speeding up database work by 30%
- Designed a cohesive user interface for 50+ pages by creating and documenting React components in TypeScript

Receptionist

May 2023 – Present

Tufts University, Office of Academic Space Management

Somerville, MA

• Service community via organizing mail, and analyzing building usage for largest academic buildings on Tufts campus.

## Visual Communications Intern

May 2021 – August 2021

Texas Heart Institute

Houston, TX

- Designed graphics and created animations representing cardiological research for publicity
- Interviewed for animation work by the Houston Chronicle

## Relevant Projects

Globetrotter | TypeScript, Node.js, Python, PostgresSQL

July 2024 – Present

- Created an animated, interactive travel sharing product by modeling, planning, and writing a full stack web application
- Designed a modern, lively frontend with a responsive map, menu, and user statistics page using React, Tailwind CSS, and APIs from Mapbox and deck.gl
- Unified user interface by modeling 50 components in Figma before development
- Displayed over 40,000 airports on map client using RESTful APIs to communicate between frontend and backend
- Enhanced airports data by synthesizing 20+ large-scale, open-source datasets using CRUD applications developed in Python
- Hosted backend server by managing a PostgresSQL database within a Docker container on an AWS EC2 instance

# Universal Machine | C, x86-64 Assembly, Bash

November 2023 – December 2023

- Created a Turing Complete virtual machine using object-oriented programming principles, separating functionality like I/O, machine arithmetic, logic, and memory; tested components with custom-devised unit-testing framework
- Optimized the program by analyzing x86-64 Assembly instructions and qcachegrind and minimized expensive operations such as dereferencing or allocation through reuse of memory; verified performance gains via benchmarking against 1,000,000,000+ instruction binaries
- Recreated the venerable HP15-C via Assembly instructions derived from the Universal Machine's ISA

## World Clock | JavaScript, HTML, CSS

August 2023

- Constructed a web application showing the time of user-chosen cities, with a helpful, responsive map to aid in visualization
- Integrated OpenStreetMap and MapBox libraries for graphics. APIs were chosen as they best met the scalability requirements
- Published application to personal website with custom autocomplete search bar and tracked development with Git

# EXTRACURRICULAR ACTIVITIES

Spoken Languages: Proficiency in English, Hindi, Spanish, French, and Urdu

Media: Droneography, Photoshop, Lightroom, After Effects, Davinci Resolve Studio, Premiere Pro, InDesign, Wordpress

Travel: Hiking mountains, traveling to novel destinations, searching for amazing flight deals
