EDUCATION

Tufts University August 2022 – May 2026
GPA 3.73, BS Computer Science, BS Mathematics, Dean's List (Fall 2022, Spring 2024) Somerville, MA
Relevant Coursework: Algorithms, Network security, Machine structure, Data structures, Multivariable calculus, Linear algebra

SKILLS

Programming Languages: C/C++, Python, x86-64 Assembly, TypeScript, ReactJS, Node.js
Tools and Technologies: DevOps, Docker, Django, MongoDB, SQL, Tailwind CSS, Figma

EXPERIENCE

Course Assistant for Machine Structure, Assembly Programming, and Data Structures May 2023 – Present
Tufts University, Department of Computer Science Somerville, MA
- Strengthened course infrastructure for **200+ students** by improving autograding software, staff software, and assignment solutions
- Contributed **20+ unit tests** to autograder by finding edge behavior in students' submissions
- Developed internal software to organize scoring of submissions between course staff
- Graded assignments by studying **60+ submissions** for functionality, testing, and course coding standards
- Reinforced course objectives and debugging principles during **1500+ student interactions** by explaining lecture topics and assignments in office hours
- Strengthened understanding of course material weekly for a **30+ student lab** by delivering comprehensive lectures

Full Stack Developer September 2023 – May 2024
Tufts JumboCode Somerville, MA
- Enhanced the information display for the **1,000,000+ annual visitors** of the Emerald Necklace Conservancy by designing an full-stack web app in a tight-knit, agile team
- Created a secure page modification system for park administration by maintaining a MongoDB database for information, and an authentication system for editing privileges
- Designed a cohesive user interface for **50+ pages** by creating and documenting React components in TypeScript

Receptionist May 2023 – Present
Tufts University, Office of Academic Space Management Somerville, MA
- Service community via organizing mail, and analyzing building usage for largest academic buildings on Tufts campus.

Visual Communications Intern May 2021 – August 2021
Texas Heart Institute Houston, TX
- Designed graphics and created animations representing cardiological research for publicity
- Interviewed for animation work by the *Houston Chronicle*

RELEVANT PROJECTS

Universal Machine | *C, x86-64 Assembly, Bash* November – December 2023
- Created a Turing Complete virtual machine supporting I/O, machine arithmetic, logic, and memory tested with custom-devised unit-testing framework.
- Optimized the program by analyzing x86-64 Assembly instructions and `qcachegrind` and minimized expensive operations such as dereferencing or allocation through reuse of memory.
- Recreated the venerable HP15-C via Assembly instructions derived from the Universal Machine's ISA.

World Clock | *JavaScript, HTML, CSS* August 2023
- Constructed a web application showing the time of user-chosen cities, with a helpful, responsive map to aid in visualization.
- Integrated OpenStreetMap and MapBox libraries for graphics. APIs were chosen as they best met the scalability requirements.
- Published application to personal website with custom autocomplete search bar and tracked development with Git

vfl | *C, Python* October 2023 – February 2024
- Designed a file format that encodes flight itineraries into bitpacked data.
- Wrote a collection of Python modules that aid the compression, like quantizing timezones, or finding the UTC offset of an airport, given its code.

SSH Setup Guide | *shell, LaTeX* March 2024
- Wrote a concise guide for setting up a secure connection to a server.
- Described how to create public/private key pair to authenticate with server, how to setup a shell alias to quickly login to a server, and how to use key for password-less authentication in an SFTP connection.
- Created GitHub Actions pipeline to compile TeX→ PDF, publish to repository releases and webpage.

arith | *C* October 2023
- Wrote a JPEG-style compressor/decompressor utilizing a block-wise transformation.
- Broke transformation into separate modules to thoroughly test functionality in each step.

Encrypted IM | *Python* January 2024
- Implemented a peer-to-peer encrypted instant messenger using the AES-256 CBC cipher, as a practice in network programming and encryption.

EXTRACURRICULAR ACTIVITIES

Spoken Languages: Proficiency in English, Hindi, Spanish, and French
Media: Droneography, Photoshop, Lightroom, After Effects, Davinci Resolve Studio, Premiere Pro, InDesign, Wordpress
Travel: Hiking mountains, traveling to novel destinations, searching for amazing flight deals
Standards: Expert in recalling IATA airport codes, ISO country codes, and timezones
