EDUCATION

Tufts University   August 2022 – May 2026
GPA 3.64, BS Computer Science, BS Mathematics, Dean's List (Fall 2022, Spring 2024)   *Somerville, MA*
Relevant Coursework: Machine learning, Algorithms, Machine structure, Data structures, Statistics theory, Operating systems
Probability theory, Abstract algebra, Programming language theory, Network security, Assembly programming, Linguistics theory

SKILLS

Programming Languages: C/C++, Python, TypeScript, React, Rust, x86-64 Assembly, Standard ML, OCaml
Tools and Technologies: Node.js, DevOps, Docker, MongoDB, PostgreSQL, AWS, Scikit-learn, Pandas, NumPy, Matplotlib, Tailwind CSS, Figma, HTML

EXPERIENCE

Teaching Fellow for Machine Structure & Assembly Programming   January 2025 – Present
Tufts University, Department of Computer Science   *Somerville, MA*
- Improved **200+ students'** ability to engineer large-scale, low-level programs by encouraging rigorous testing, building modular architecture, creating powerful data abstractions, writing strong documentation, and harnessing standard libraries.
- Elevated students' experience by reviewing **100+ program design submissions**; ensured constructive grading comments to help students create effective implementations.
- Probed students on implementation choices and debugging solutions in **2000+ interactions** during personal office hours.
- Enriched **100+ students'** developer soft skills (i.e. pair programming, product ownership) by introducing one-on-one code reviews.
- Improved student comprehension by leading review session for **100+ students** covering key course content and exam preparation.
- Introduced new concepts to **30+ students** weekly by delivering comprehensive lectures and visualizing course concepts.

Teaching Assistant for Data Structures, Machine Structure & Assembly Programming May 2023 – December 2024
Tufts University, Department of Computer Science   *Somerville, MA*
- Strengthened course infrastructure for **200+ students** by improving autograding software, staff software, and assignment solutions; contributed **20+ unit tests** to autograder by finding edge behavior in students' submissions.
- Developed internal software to organize scoring of submissions between course staff using CI/CD pipelines to integrate updates into course infrastructure.
- Graded assignments by studying **200+ submissions** for functionality, testing, and course coding standards.
- Reinforced course objectives and debugging principles during **2500+ student interactions** by explaining lecture topics and assignments in office hours.
- Strengthened understanding of course material weekly for a **30+ student lab** by delivering comprehensive lectures.
- Emphasized learning objectives for graduate offering of data structures by restructuring assignment scoring, incorporating new assignments, and holding virtual office hours.

Full Stack Developer   September 2023 – May 2024
Tufts JumboCode   *Somerville, MA*
- Enhanced the information display for the **1,000,000+ annual visitors** of the Emerald Necklace Conservancy by designing a full-stack iOS/web application in a tight-knit, agile team
- Created a secure page modification system for park administration by maintaining a MongoDB database for information, and an authentication system for editing privileges
- Automated database maintenance using PyMongo, reducing manual data handling tasks, and speeding up database work **by 30%**
- Designed a cohesive user interface for **50+ pages** by creating and documenting React components in TypeScript

Receptionist   May 2023 – Present
Tufts University, Office of Academic Space Management   *Somerville, MA*
- Service community via organizing mail, and analyzing building usage for largest academic buildings on Tufts campus.

Visual Communications Intern   May 2021 – August 2021
Texas Heart Institute   *Houston, TX*
- Designed graphics and created animations representing cardiological research for publicity
- Interviewed for animation work by the *Houston Chronicle*

RELEVANT PROJECTS

Globetrotter | *TypeScript, Node.js, Python, PostgresSQL*   July 2024 – Present
- Created an animated, interactive travel sharing product by modeling, planning, and writing a full stack web application
- Designed a modern, lively frontend with a responsive map, menu, and user statistics page using React, Tailwind CSS, and APIs from Mapbox and deck.gl
- Unified user interface by **modeling 50 components** in Figma before development
- Displayed **over 40,000 airports** on map client using RESTful APIs to communicate between frontend and backend
- Enhanced airports data by synthesizing **20+ large-scale, open-source datasets** using CRUD applications developed in Python
- Hosted backend server by managing a PostgresSQL database within a Docker container on an AWS EC2 instance

Universal Machine | *C, x86-64 Assembly, Bash*   November 2023 – December 2023
- Created a Turing Complete virtual machine using **object-oriented programming principles**, separating functionality like I/O, machine arithmetic, logic, and memory; tested components with custom-devised unit-testing framework
- Optimized the program by analyzing x86-64 Assembly instructions and `qcachegrind` and minimized expensive operations such as dereferencing or allocation through reuse of memory; verified performance gains via benchmarking against **1,000,000,000+ instruction** binaries
- Recreated the venerable HP15-C via Assembly instructions derived from the Universal Machine's ISA

EXTRACURRICULAR ACTIVITIES

Spoken Languages: Proficiency in English, Hindi, Urdu, Spanish, and French
Media: Droneography, Photoshop, Lightroom, After Effects, Davinci Resolve Studio, Premiere Pro, InDesign, Wordpress
Travel: Hiking mountains, traveling to novel destinations, searching for amazing flight deals
